Charging the headset

Open the Micro USB port cover & connect the Micro USB end of the charging cable to the USB port on the Left earcup

Use the included Micro USB cable to connect the headset with a Micro USB port on your computer or with a Micro USB wall adapter. Charging will start automatically when the headset connected and the red indicator light will turn on. Once charging is complete, the light will turn off.

Note: Make sure you charge the unit for at least 8 hours before first use.

Power ON/ OFF

Power ON > Press & hold MFB for 3 seconds to power ON.
LED indicator will flash once every 4 seconds

Power OFF > Press & hold MFB for 3 seconds to power OFF.
LED indicator will go off.

WARNING: DO NOT insert your in-ear headphones too deeply into your ears. Doing so may cause permanent damage to your eardrums and can interfere with sound quality.

How to Pair

“Pairing” means creating a trusted relationship between two or more Bluetooth devices. The devices must be paired before they can communicate with each other. Pairing identification is stored for later use, and the devices will automatically recognize each other the next time they are connected.

Note: Your audio device must support Bluetooth A2DP compatibility to connect with the headset connected to your audio device. Please consult the user manual for the device with which you are pairing.

How to pair with mobile phones, iPhone™, iPod touch® or other devices

1. Place the Sync by 50 in-ear BT within 30 cm of the device with which you are pairing.
2. Press MFB for about 5 seconds or until the red and blue LEDs flash alternately. The headset will now be in “pairing mode.”

3. Initiate the Bluetooth search function in your mobile phone. Please refer to the user's manual for your mobile phone for more information.

4. Select Sync by 50 in-ear BT in the device list on the phone and follow the instructions to proceed.

5. Follow the instruction to enter the pairing code "0000". The red LED indicator will stop flashing if pairing is successful. Sync by 50 in-ear BT device ID should be stored in the device list of the phone so that no pairing code will be required for the next use.

After pairing with your Sync by 50 in-ear Bluetooth enabled device, start your device's media player and the music will begin playing on your headphones.

Playing audio

Select the audio player on your source device & select play via Sync by 50 in-ear B.T

The audio will automatically start streaming to the headset.

Press MFB once to PAUSE audio & again to Play audio.

Adjust volume level by press & hold the Volume UP key or Volume DOWN key for 1 second

Note: a BEEP tone will be audible when the volume control has reached the minimum & maximum level.

At any time during a phone call, or while playing music, the volume can be changed with the Vol+ or Vol- keys. There will be a tone from the headphones to indicate that the level has reached maximum or minimum volume.

Selecting FWD or REW tracks

Double press the Vol UP for next track

Double press the Vol DOWN for previous track

Note: Some audio players select previous track to the start point of the current track

Note: This function will only work properly when connected directly to a Bluetooth A2DP compatible

“music player. For example, this function is inoperable when connected to a Bluetooth transmitter”

adapter that transmits music from the headphone jack. Not all functionality is available with every device.

For a list of compatible devices, please go to www.smsaudio.com

Answering Calls

Answer/ End incoming call > Press MFB once

Redial last call > Press MFB twice

Reject Call > Press & hold MFB

If you are connected to and playing music from a mobile phone, a brief tone will be heard to notify you that there is an incoming call. Press the MFB once to answer the call and press it once again to end the call. While the call is in progress, the music will pause and once the call has ended, the music play will be automatically resumed.
